March 12, 1988

Dear Ms. Bellmann,

Due to our present situation in the West Bank, it is our duty to inform you about the changes that occurred since February 15, 1988.

We, as a charitable society were obliged to offer the curative and preventive services in the villages besides Birzeit Health C. through all the week to help the people for the following reasons:

- a) Patients are not able to reach towns for medical consultation because of the blockage of roads, violence activities from the army and also out of fear.
- b) All the head of the families left their work as labourers with the Israeli, others were arrested and put in jail, and youngsters have fled. Only old men, women and children are left who became dependent, poor, and in great need of support and health services.

Accordingly, our health team accompanied by a Medical officer is visiting daily one village, treating the patients without any charge, also medication is issued free. We do not know until when the situation will last for it is becoming worse.

Being so kind with the Society, we are sure that you still care to help us to help others in such a difficult time; if possible to support the Society an urgent grant to buy medicines to continue helping our people who are suffering so much.
